VERBAL DESCRIPTION:

surface 10YR 7/3
paint 10R 4/6

Hardness 2.5

This is a large censer handle, glued together from four pieces. Red paint still covers much of the handle, but it probably covered the whole handle originally. There is a distinct cessation of paint where the handle joins the ^{inside of the} bowl, the fragment of which visible is darkened by use. There was originally a bridge between the top and bottom of the handle, falling 1 cm forward of the center of the length of the handle. (i.e. there ~~is~~ is 6 cm of empty space behind it and 4 cm forward of it. This bridge was ~1.5 cm wide. At visible breaks the firing core extends to within 2 mm of the surface. The edge of the bowl visible is 7-10 mm thick.
